

Experiment 61002 / Trial 61841 | supplied log: steps 1-306
P-state update collapse is directly observed; video-quality gain is not measured

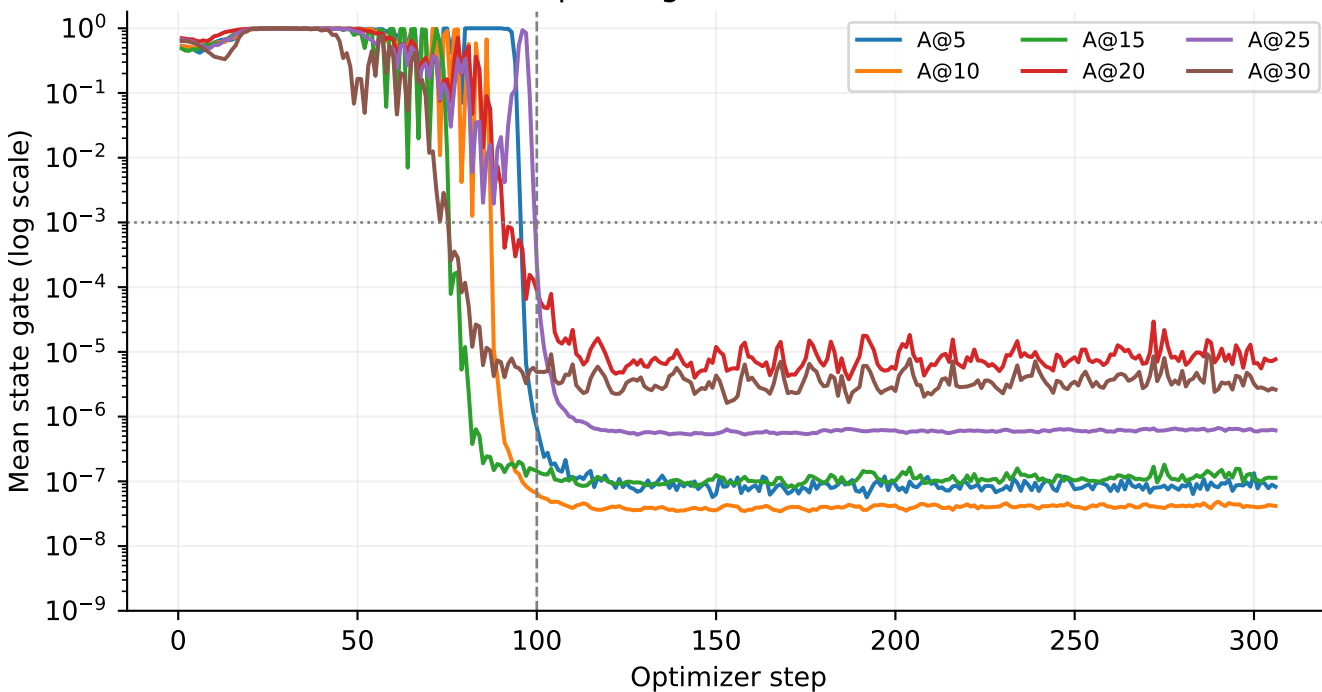

Loss terms: thin raw, thick trailing 25-step mean

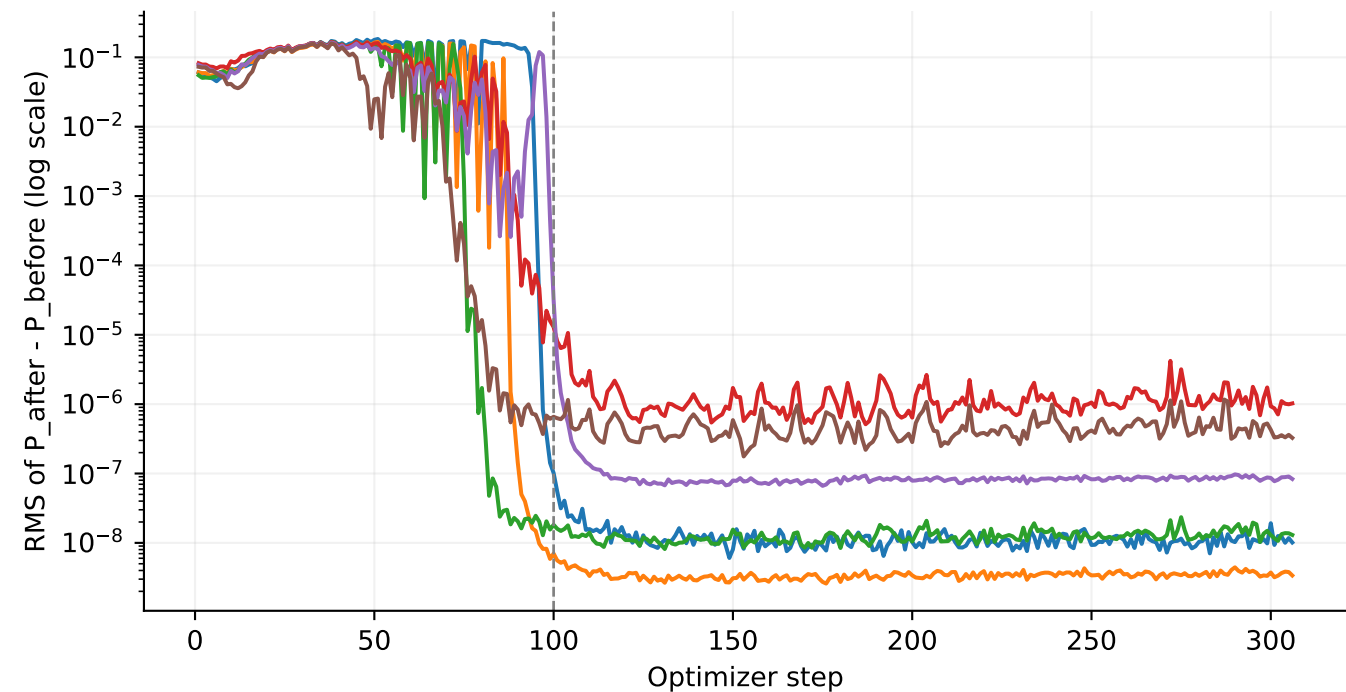

After step 100, corrected P overlaps initial P

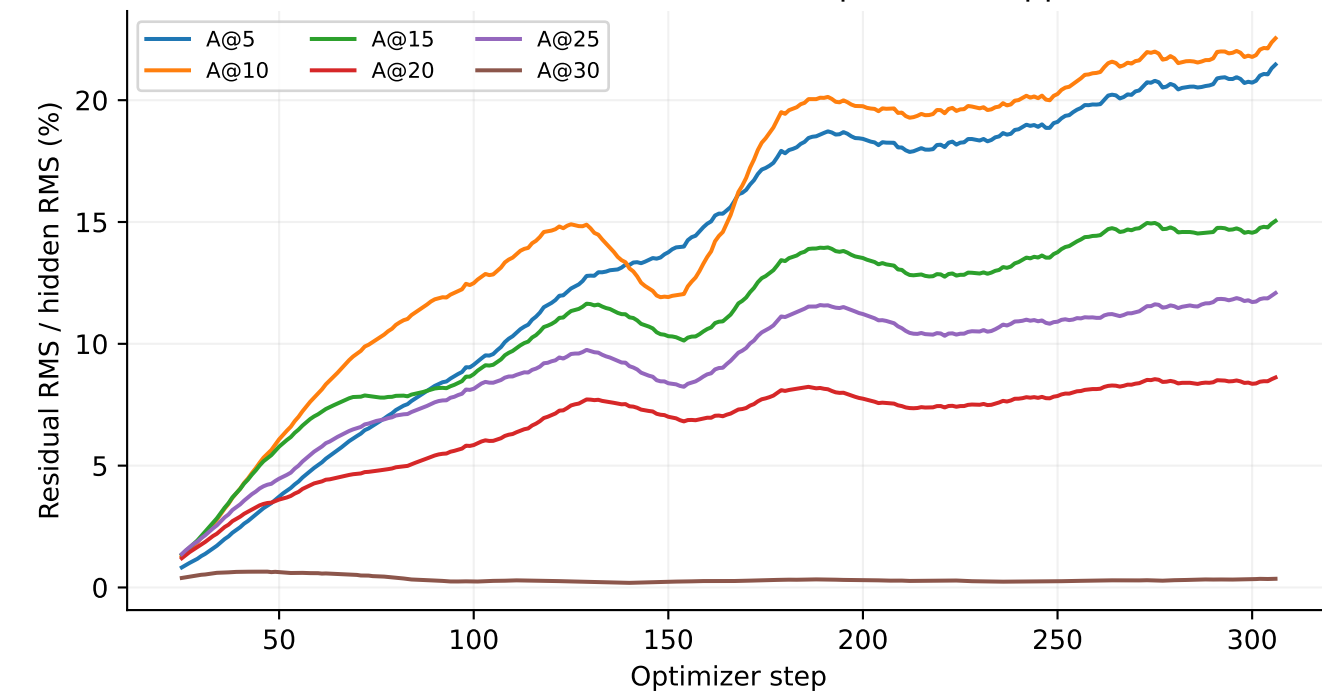

All six P-update gates saturate near zero

Actual P increments vanish

Writers remain active while P updates disappear

FM by per-sample sigma: 50-step descriptive means
