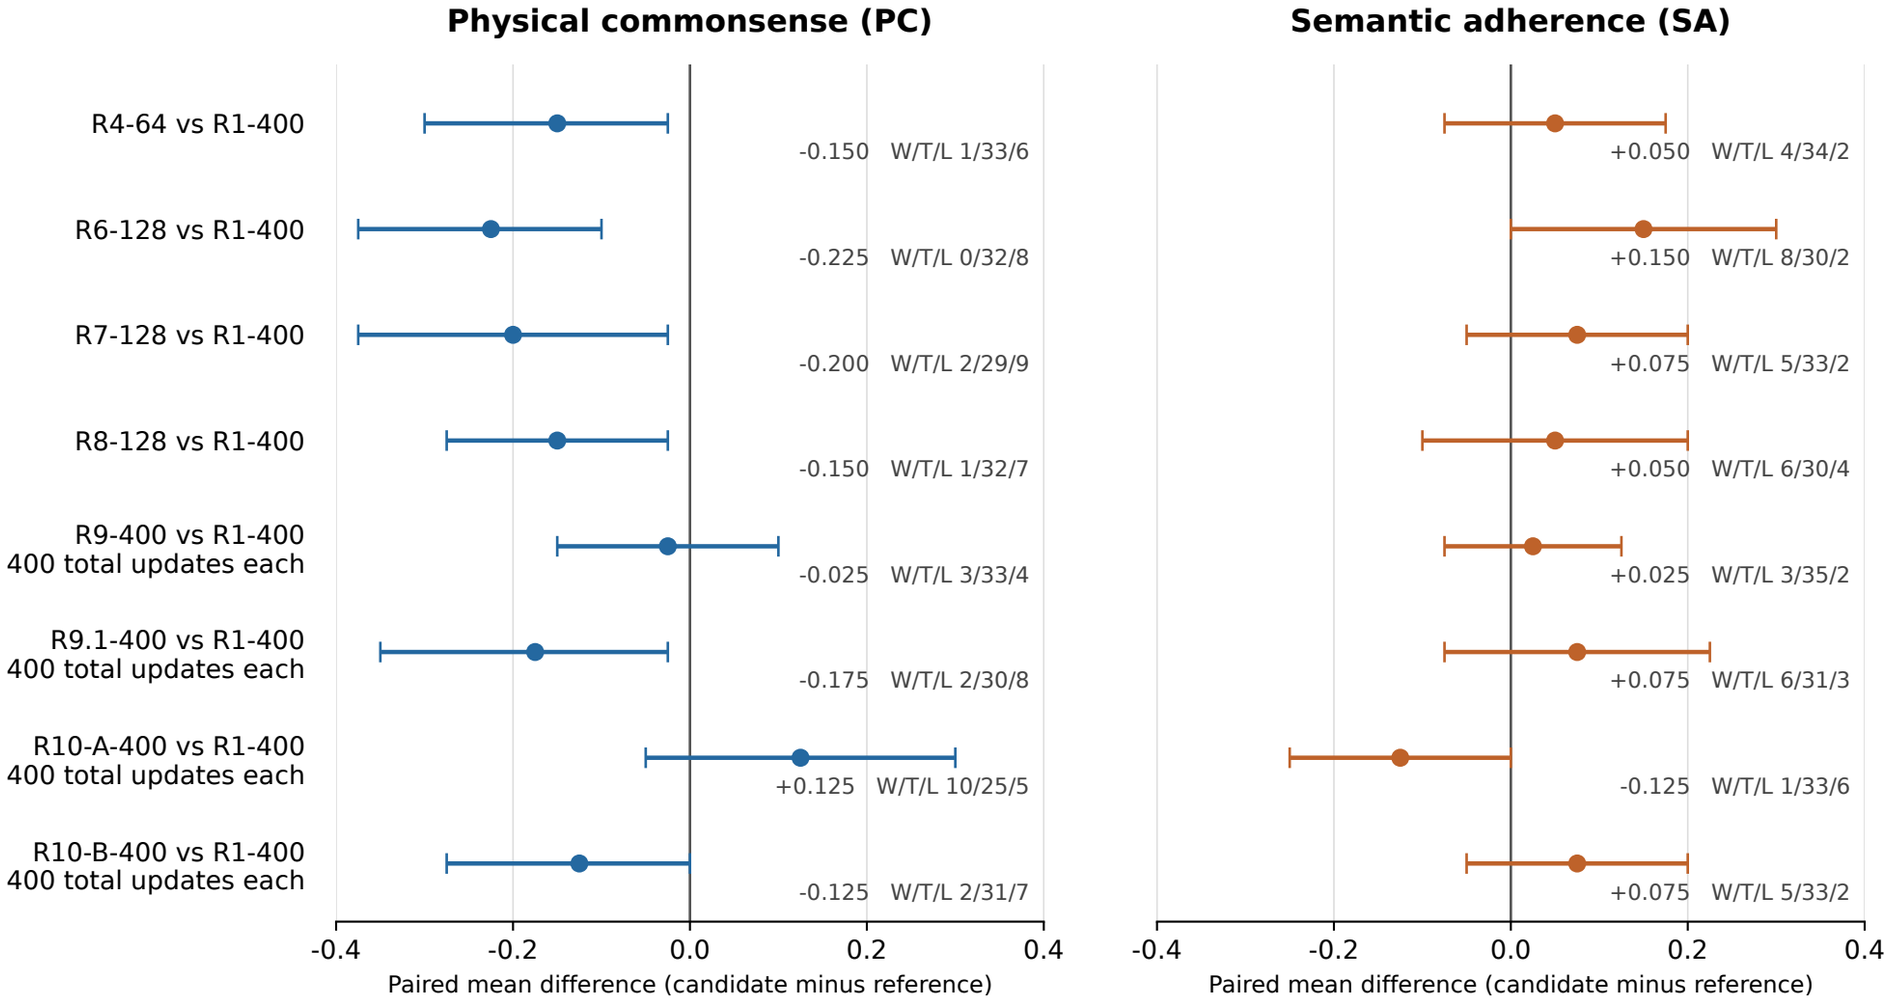
Generation relative to the preserved R1-400 reference

Seed 42; native text guidance 5; active physical guidance 5.



Fixed40; paired mean differences and existing95% intervals. R1-400 reference:PC3.625/SA2.950.
R4/R6/R7/R8 have shorter budgets and different recipes; these rows assess replacement quality, not isolated architecture effects.
The final400 candidates appear only after complete scores. A SA gain cannot compensate for a PC loss.
